

Paperless Audit Mercia/CCH Prosystem Audit Automation

The next generation of automated paperless audit

In today's increasingly competitive environment all accountancy firms must look at ways they can increase profitability, meet strict audit compliance and maintain control throughout the audit process.

Changes introduced by International Standards on Auditing (ISA) have put new demands on auditors in the way they plan and carry out their audit, with knock-on implications that increase costs.

Many firms are also considering a migration to paperless solutions but want guidance in making correct decisions on both products and processes to ensure success.

If you would like to reduce the time spent on planning and carrying out audits and the burden of the paper mountains that auditing can create, then CCH ProSystem Audit Automation is a must for your practice.

CCH ProSystem Audit Automation offers Mercia methodologies including charity, pensions and audit exempt packs.

Key features of Mercia/CCH Prosystem Audit Automation

- An audit file that allows the user to see at a glance what is outstanding
- Unique feature allowing the user to drill down to each audit area and view the risks aligned to it.
- Includes a summary screen which creates reports showing planner changes, computer changes, etc.
- Sample size is calculated automatically using the sample calculator
- Offers test/questions/uncleared notes outstanding as a part of the audit summary.
- Extensive analytical review tools
- Fully integrated and interactive accounts disclosure checklists
